SKILLS

Main: React - Typescript - HTML - CSS - Figma - Tailwind - Git - Agile Methodology

Side: Next.js - Angular - Javascript - Java - Spring boot - Python - Node.js - Mysql Server
- SQL Server - Postman - Excel - Power Bi

EXPERIENCE

ByTech - Front End Developer & Designer UX-UI

Sep 2024 - Nov 2024

Worked for a technology ecommerce client located in Argentina For this client I have:

- Interface design with Figma, defining color palettes, logos and fonts.
- Development of a website with fluid user experience and reusable components.
- I work with: React, TypeScript, Tailwind, VS Code, Figma, Adobe Colors, GitHub.

Vinoteca - Front End Developer

May 2024 - Aug 2024

Worked for a Wine cellar client located in Argentina For this client I have:

- Use Figma to design the interface, defining color palettes, logo, typography, and structure.
- Develop a website where it offers a fluid user experience; Create reusable components, with a responsive design to adapt to different devices.
- To ensure the security of customer data, Keycloak was used. Work on customizing each component and page of it so that it integrates perfectly with the website.
- I work with: Next.js, Typescript, Tailwind, Shandcn, VS Code. Figma, GitHub, Keycloak

Tourism Blog - Front End Developer & Designer

Apr 2024 - June 2024

Worked for a tourism blog in Argentina For this client I have:

- I designed the initial blog layout, defining the structure of the pages and the layout of the topics.
- I considered how to organize the information so that users can easily navigate and at the same time, it is visually appealing and easy to read.

- I worked with a color palette inspired by the vibrant culture of Buenos Aires and we selected a typography that reflects the elegance and passion of the city.
- I implemented validations for forms, making sure that users can communicate effectively.
- I work with: Html, Css, Bootstrap, Javascript. Figma, Adobe colors, Google fonts, FontAwesome, GitHub, VS Code, Trello.

Digital House - Full Stack Developer

May 2023 - July 2023

Worked for an instrument ecommerce. For this client I have:

- I established a color scheme and logo that reflects the harmony and diversity of the instruments.
- The application structure was carefully planned to offer intuitive navigation and a pleasant experience for users.
- I implemented a CRUD system to manage the available instruments.
- I developed components to display the rating of each instrument.
- I created validations for the rental forms, ensuring that users provide accurate information. I designed a calendar structure so that customers could easily select rental dates.
- I implemented search filters so that users could quickly find the instruments they needed.
- I work with: React JS, React-calendar, Material UI, Font Awesome, VS Code. Figma, Trello, Java - Spring boot, IntelliJ, MySq.
